

Aliaksandr Zhebit

Belarus, Gomel

aliaksandr.zhebit@gmail.com | [GitHub](#) | [LinkedIn](#) | [Web](#)

Software Engineer with 5+ years of experience in frontend and full-stack development. Experienced in building enterprise web applications, dashboards, ERP/CRM workflows, and developer automation tools. Skilled in designing user-facing workflows, improving complex UI systems, and working across frontend, backend, databases, and integrations.

Experience

CAE TECHNOLOGY 2024 - Present

Full-Stack .NET Developer

Delivered frontend-focused features for electronic components distribution, supply chain analytics and operations, and ERP/CRM workflows. Built Angular interfaces and contributed to .NET backend services, SQL Server logic, queues, background workers, and integrations. Led technical interviews and supported onboarding, mentoring, UI testing, and releases.

Sourceability 2024 - 2026

Stack: Angular 17, PrimeNG, ChartJS, .NET 8, ASP.NET Core, EF Core, SQL Server, RabbitMQ, SignalR

Platform: Engineered an ERP/CRM platform handling supply chain, RFQ workflows, and warehouse operations for electronic components distribution, featuring custom NetSuite integrations.

Key Contributions

- Led UI development for internal systems, including dashboards, reporting charts, reusable table components, state management, UI library extensions, and layout customization.
- Built backend functionality using .NET services, SQL Server (views, stored procedures, functions), message queues, and background workers.
- Resolved performance bottlenecks across Angular rendering, API delays, and database timeouts.
- Integrated an Angular UI testing step into Azure Pipelines.
- Contributed to an internal .NET-based Model Context Protocol (MCP) server for Azure DevOps integration to expose work item context to AI tools.
- Audited production issues and implemented fixes across affected frontend and backend flows.
- Supported UAT and Production releases.
- Consulted and assisted team members.

Zollner Dashboard Platform 2025

Stack: Angular 19, PrimeNG, ChartJS, .NET 10, ASP.NET Core, EF Core, SQL Server, RabbitMQ

Platform: Sourcing and supply chain analytics platform providing visibility into PPV, shortages, package history, KPI metrics.

Key Contributions

- Led frontend development for the Zollner dashboard, translating PRD requirements into Shortage and PPV workflows with audit trail support.
- Delivered backend logic for KPI calculations and aggregated reporting APIs.
- Resolved user feedback and UAT findings to improve dashboard calculation reliability and workflow usability.
- Supported UAT and Production releases.

Agentic Development 2026

Stack: Anthropic Claude API, Python, Docker, Azure DevOps

Platform: Internal PoC evaluating Python agents, BMAD frameworks, local LLMs, and Docker automation for an AI-assisted web application generation pipeline (early prototype stage).

Key Contributions

- Developed an initial prototype for frontend solution generation, validation, and automation of developer workflows.
- Investigated agentic workflow frameworks, local LLM execution, Docker-based agent runs, and CI/CD triggers.

ITECHART GROUP 2020 - 2023

Software Engineer

Developed and maintained web applications using JavaScript, TypeScript, .NET, React, Angular, Node.js, and SQL. Collaborated with cross-functional teams, conducted code reviews, and optimized application performance.

Ernst & Young (EY) Raptor 2021 - 2023

Position: Lead Frontend / Full-Stack Engineer

Stack: Angular 7-14, ASP.NET Core, SSMS, SQL, Azure

Platform: EY Global Tax Platform (GTP), a secure cloud environment integrating data sources for analytics, compliance, and tax visibility.

Key Contributions

- Spearheaded the frontend development efforts as Lead Engineer, overseeing the design, development, and optimization of modular and reusable components.
- Implemented feature modules with complex logic and interceptors for seamless user experiences.
- Optimized application performance, achieving a 20% increase in responsiveness and a 30% reduction in development time.
- Conducted codebase cleanups to reduce technical debt and improve maintainability.
- Increased test coverage from 30% to 70%.
- Played a pivotal role in supporting and enhancing the Micro Frontend (MFE) system, including chunk generation, lazy loading, and resolving critical issues.
- Proactively identified and resolved production issues, ensuring smooth application operation and minimizing downtime.
- Built backend endpoints, database tables, migrations, and import/export functionalities.
- Mentored UI developers across teams and provided basic DevOps support (variable management, Git flow pre-push hooks).

MPRE 2020 - 2021

Position: Frontend Engineer

Stack: Angular, React, Django, Postgres, Docker, CircleCI, Sentry

Platform: Swiss real estate platform integrating property search, valuation, and financing solutions.

Key Contributions

- Led frontend efforts using Angular, Angular Material, and Chart.js to scale the platform and improve the UI.
- Integrated Google APIs (Maps, Street View, Analytics) for enhanced user insights.
- Refactored and redesigned the frontend source code.

Open Source

Raycast 2024

Stack: React, Node.js, Swift, AppleScript

Platform: Raycast is an open-source collection of powerful productivity tools integrated into an extendable launcher.

Contributed extensions

- **Speedtest (50k+ downloads):** Runs internet speed tests directly from the app.
- **ConsoleDev (1.5k+ downloads):** Integrates essential developer console tools.
- **Toggle Audio Input (1k+ downloads):** Command and menu bar extension to mute/unmute microphones.

Education

Francysk Skorina Gomel State University - Bachelor's Degree 2015 - 2019
